

Apple of the eye:

This image is also very personal. I used the stones as the earth element to create the shape of the eye. The little wing on the edge is inspired by makeup as my sister is a makeup artist and i shoot her portfolio work.

The apple is significant to my daily life as my phone is an apple product and through the use of siri i am able to type and have messages read back to me.

I kept the root to signify the optic nerve. Upon careful inspection you will notice a green iris and a shadow carefully cast to create the pupil. The optic nerve is growing outwards because thats what it feels like when i over exert my eye. It feels like my eyes want to melt out of my skull.

My pain and my comfort is induced through my eyes. As the saying goes; We lose ourselves in the things we love, we find ourselves there too.
